Combining advanced optical technology with thoughtful design considerations, the Rodenstock HR Digaron-W 70mm f/5.6 Aperture Body Lens delivers high-resolution imaging performance for photographers seeking precise and satisfying large

Product information

format results using digital backs. While the recommended apertures of f/5.6-8 consistently create sharp, detailed images, the lens' open aperture is free from vignetting and can also be used as a working aperture. The high-resolution image quality tops out at 100 line-pairs per mm with a pixel pitch of 5 μ m. The optical design achieves symmetrical reproduction and avoids blurring and color fringing with its 2mm-thick sensor glass. Even at short focal lengths, the retro focus design allows ample space for camera movements between the lens and the sensor.
