Unlike conventional loudspeakers, the Move is a point source built with a full-range transducer.
The entire spectrum of the music signal is reproduced by only one voice coil. Completely lossless and without crossover.
The amplifier output is directly connected to the transducer. A super tweeter extends the high-frequency range up to 36 kHz and provides a rarely heard transparency for recordings with high sampling rates.

Product information

Technical Specifications:

General:
Full-range point source with high frequency extension.
Wide dispersion, perfect time domain, ultra-low loss.
The full-range emitter operates from 40 Hz to 9 kHz.
An air motion transformer extends the frequency range by two octaves to 36 kHz.

Values:
Impedance: 8 ohms nominal
Frequency range: 40 Hz – 36 kHz
Sensitivity: 87 dB @ 2,83 V (1 W into 8 ohms)
Input power: 30 W thermal, 60 W impulse
Dimensions (HWD): 350 x 186 x 305 mm
Weight: 6.5 kg
