The 907X 50C Control Grip is designed to beautifully complement the 907X 50C, putting the photographer's most important functions right at their fingertips. It allows for quick adjustment of aperture, shutter speed and fast AF point selection via the joystick. Additional buttons allow quick access to image browsing and menu options. All four buttons on the Control Grip are customizable and there are 30 different functions to choose from. The Control Grip brings a comprehensive balance to the

combination, whether you are shooting at eye or waist level or in a vertical orientation, while also allowing you to adjust the main settings with a simple click. The 907X Control Grip is also an advantageous alternative to using the touchscreen when shooting in cold weather with gloves on.
