Lightweight wide-angle lens for street photography

The XCD 4/28P wide-angle lens has a focal length of 22 mm and weighs just 245 g and is 43.5 mm long. It has an f/4.0 aperture, making it ideal for street photography. With its superior optical design that offers outstanding image quality and precise focusing technology for instant shooting, the XCD 4/28P captures a variety of extraordinary scenes such as nature,

city streets and urban architecture.

Exquisite, lightweight, handy

At 43.5 mm long and 245 g heavy, the XCD 4/28P is the lightest and smallest lens in the Hasselblad X System and the lightest lens in the current medium format lens system. [1] This handy, high-performance lens puts everything you need to capture the world in your hand.

Continuing the innovative design language of the XCD series lenses, the lens features a metal body and focusing ring engraved with the Hasselblad "H," symbolizing Hasselblad's enduring legacy of excellent craftsmanship.

Unparalleled optical performance, stunning image detail

Capturing the finest nuances of light and shadow begins with the lens. The XCD 4/28P features an optical structure of nine elements in eight groups, including two aspherical elements and one ED glass element, which ensures excellent imaging while effectively suppressing chromatic dispersion. The lens boasts a well-thought-out layout, compact size and high performance that meets the resolution requirements of 100 million pixels. The lens delivers sharp images with high precision and high resolution from the center to the edges, delivering stunning image quality throughout the image.
