Goods can be ordered - please inquire about the delivery time (not in stock)

The Battery Charging Hub simplifies the battery charging process with two slots that allow charging of two batteries simultaneously. An integrated USB Type-C port draws power from either the included AC adapter or external USB power banks (sold separately). LEDs on the front indicate status and capacity during charging. Or the user can use the Battery Charging Hub to check the charge level of a battery simply by inserting it and pressing a button.

Product information

The Battery Charging Hub supports both first-generation 3200mAh X System batteries and the current 3400mAh battery. The latter supports fast charging - up to 25% faster than the first batteries. This equates to a full charge of a single battery in 2.3 hours or two batteries in 2.8 hours. The first-generation 3200mAh batteries fully charge in about 3 hours. Full charge is indicated by a beep.
