Hasselblad UV filters block most UV light and optimally reduce its negative impact on the image. The filters meet Hasselblad's strict optical standards and high quality requirements and fit perfectly with Hasselblad lenses. They are an essential accessory for every creative photographer.

Product information

With Schott B 270 glass and double-sided 30-layer, low-reflection optical coating with an average light transmittance of over 98.5%, scattered light is effectively minimized and image sharpness is ensured, even when shooting against the light. The filter also protects the lens.

Can realize a wide UV limit of 300-410nm and eliminate blue and violet light reflections to restore colors accurately and faithfully.

The nano-coating makes the filter water- and oil-resistant, scratch-resistant and anti-static, which increases its lifespan and allows the filter to be used effortlessly even in harsh outdoor environments.

Specifications:
Light transmittance: On average >98.5%
Coating: Multi-layer nano coating
Weight: 14g
Height: 5.5mm (when mounted on the lens, the part outside the lens is 3.0mm high)
Filter frame material: aluminum-magnesium alloy
Other features: Water and oil resistant, scratch resistant and anti-static.
Compatibility: Hasselblad XCD 4/45P
