The Eos 4.0em Power Cable uses high purity 4mm² OFC conductors in combination with a carbon-loaded screen with our dd (dual drain) termination configuration in a high-efficiency stable PVC dielectric. Particularly well-suited to components with high power requirements, the Eos 4.0em is designed to deliver optimum performance from the most sophisticated ‘high-end’ audio systems and is an ideal choice to use between wall socket and our Eos Modular 4.0em power block.
