LaCie 1big Dock is a Thunderbolt storage hub for filmmakers that allows you to transfer files directly to the device via the integrated CF and SD card slots. The hub supports two 4K monitors, daisy chaining of devices via USB-C and USB 3.0, and charging laptops with up to 60 W – all via a single cable. Add to that a sophisticated cooling design and a replaceable enterprise drive with self-maintenance function, because what really matters? Maximum reliability. Design by Neil Poulton
