Goods can be ordered - please inquire about the delivery time (not in stock)

A high-quality upgrade for existing Rega Carbon cartridges – specially designed for music lovers who want to get more out of their turntable.

Immediately noticeable improvement in sound quality

Product information

The Carbon Pro uses a bonded elliptical stylus that offers significantly improved sound performance compared to the conical profile of the standard model. The result: greater detail, enhanced clarity, and noticeably increased dynamics – all at a very attractive price.

Easy upgrade – installed in seconds
Installation is incredibly simple and requires no removal of the cartridge from the tonearm. The replacement takes just a few steps and is easily manageable even for beginners. An audible upgrade that will breathe new life into your vinyl collection – no technical expertise required.

This is only the stylus insert and not a complete Rega cartridge system.

Compatibility: Rega Carbon cartridges on Planar 1, Planar 1 Plus, Planar 2, and other models
