Precision you can see.

The 27-inch 5K Retina XDR display takes brightness, color, and responsiveness to the next level.1 Combined with an advanced camera, a triple-microphone array, a six-speaker system, and powerful Thunderbolt 5 ports, it's the ultimate display for professionals.

• SIMPLY BRILLIANT – Mini-LED backlighting with 2,304 dimming zones reduces halo and glare. With up to 1,000 nits of SDR brightness, you can work more comfortably even in bright environments. And 2,000 nits of HDR peak brightness delivers greater contrast between light and dark areas.2

• EVEN WIDERANGE COLOR VARIETY – With access to P3 and Adobe RGB color spaces, the Studio Display XDR delivers precision from screen to print. And there's a wide range of reference modes for filmmakers, photographers, and graphic

designers.

• SUPER-SMOOTH MOTION – A 120Hz refresh rate makes motion smoother. Adaptive Sync Enables different frame rates with precise control, ensuring the most responsive motion possible.

• HIGH POWER, PLENTY OF PORTS – Two Thunderbolt 5 ports for high-speed accessories, fast charging of Mac laptops, or daisy-chaining a second Studio Display XDR for a total of 29 million pixels. Two USB-C ports are perfect for USB peripherals or charging your iPhone.

• SHOW YOURSELF IN THE BEST LIGHT – The 12MP Center Stage Camera ensures you look your best in any lighting during video calls. Desktop View lets you share a bird's-eye view of your workspace. And the studio-quality triple microphone array ensures you're always heard clearly.

• SIX SPEAKERS. SOUND SATIONAL – Four force-balanced woofers deliver rich bass, and two high-performance tweeters provide precise mids and brilliant highs. 3D Audio creates a complex, cinematic soundscape for supported music, videos, and games.

• TWO WAYS TO ELIMINATE GLARE – The standard anti-reflective coating helps reduce reflections. Optional nano-texture glass is also available for minimal glare, even in challenging lighting conditions.

• INCLUDES STAND – The Studio Display XDR comes with a tilt and height-adjustable stand with 30 degrees of tilt and 105 mm of height adjustment. An optional VESA mount adapter is also available.
