Superpower for your studio.

An impressive 27" 5K Retina display, a 12MP Center Stage camera with desktop view, advanced microphones and speakers, and Thunderbolt 5 ports. The Studio Display is the perfect match for your Mac.

• BRILLIANCE AND GLORY – 14.7 million pixels, 600 nits of brightness, support for one billion colors, and the wide P3 color gamut bring everything to life with spectacular detail.

• ADVANCED CAMERA AND SOUND – The 12MP Center Stage camera ensures you look your best in any light and stay in frame during video calls. Desktop view makes it easy to share your workspace. And the studio-quality triple microphone array ensures that colleagues are always heard clearly.

Product information

• 6-SPOKE SOUND WITH 3D AUDIO – Four force-balanced woofers deliver rich bass, and two high-performance tweeters provide precise mids and brilliant highs. 3D audio delivers an immersive listening experience. Complex, cinematic sound for supported music, videos, and games.

• SUPERPOWER FOR YOUR STUDIO – With two Thunderbolt 5 ports, you can connect high-speed accessories, daisy-chain up to four displays, and even charge Mac laptops super-fast. Two USB-C ports are perfect for USB peripherals or charging your iPhone.

• LESS GLARE IN ANY ENVIRONMENT – A standard anti-reflective coating helps reduce reflections. Optional nano-texture glass is also available for minimal reflections, even in challenging lighting conditions.

• FOR EVERY VIEWING ANGLE – The Studio Display comes with a tilt-adjustable stand. Optional tilt-and-height stands or a VESA mount adapter are also available, so you always have the perfect view of your work.2

Specifications
