With the power of the M5.

The MacBook Air with the M5 chip combines blazing-fast performance and powerful AI capabilities in an incredibly portable design. With Apple Intelligence,[1] up to 18 hours of battery life[2] and fast SSD storage starting at 512GB, you can work, create, and play anywhere.

• WITH THE POWER OF THE M5 – With its faster CPU and shared memory, the M5 makes apps run even faster and more smoothly. This makes multitasking and creative workflows seamless and responsive. A powerful Neural Engine and a next-generation GPU with Neural Accelerators give you plenty of power for AI.

• APPLE INTELLIGENCE – Apple Intelligence is your personal intelligence system. It helps you write, express yourself, and get things done effortlessly. And thanks to revolutionary privacy protection, you can rest assured that no one can access your

Product information

data—not even Apple.[1]

• UP TO 18 HOURS OF BATTERY LIFE[2] – The MacBook Air has incredible battery life and amazing performance. This gives you enough power for the whole day. At work or in class – without having to worry about charging.
... • A BRILLIANT 13.6" DISPLAY[3] – The Liquid Retina display supports one billion colors. Photos and videos have stunning contrast with crisp details, and text is razor-sharp.

• 12MP CENTER STAGE CAMERA – Stay center stage on video calls with Auto Alignment, or share a bird's-eye view of your workspace with Desktop View. And with a triple-microphone array and a 6-speaker system with 3D Audio and Dolby Atmos, everything sounds amazing.

• CONNECT EVERYTHING – The MacBook Air has two Thunderbolt 4 ports, a MagSafe charging port, a headphone jack, and the Apple N1 Wireless chip for Wi-Fi 7 and Bluetooth 6. It also supports up to two external displays.

• MACOS MAKES APPS RUN FAST – All your essential apps run lightning fast on macOS, including built-in apps like FaceTime[5] and Messages. And with built-in antivirus and free software updates, your Mac runs smoothly and securely.

• YOU LOVE YOUR IPHONE? THEN YOU'LL LOVE THE MAC—It works seamlessly with your other Apple devices. For example, you can copy something on your iPhone and then paste it on your Mac. Send text messages with the Messages app or make and answer FaceTime calls on your Mac.5

• POWER SUPPLIES—Please note: The 13-inch MacBook Air comes with a USB-C to MagSafe 3 charging cable, but not a power adapter. To charge this device, a USB-C power adapter or other USB PD power source of 30W or more is required. For optimal charging, Apple recommends connecting this Mac to the Apple 30W USB-C Power Adapter or the 70W USB-C Power Adapter for fast charging (up to 50% in 30 minutes).6

Specifications
For a complete list, see apple.com/macbook-air/specs/.

Configurable options are available.

1 Apple Intelligence is available in beta. Some features may not be available in all regions or languages. For feature and language availability and system requirements, see support.apple.com/en-us/121115.

2 Testing conducted by Apple in January 2026 using preproduction 13-inch MacBook Air systems with Apple M5, 10-core CPU and 8-core GPU, and preproduction 15-inch MacBook Air systems with Apple M5, 10-core CPU and 10-core GPU, all configured with 16GB of RAM and a 512GB SSD. Wireless web browsing battery life was tested using 25 popular websites over a Wi-Fi connection. Video streaming battery life was tested using 1080p content in Safari over a Wi-Fi connection. All systems were tested with screen brightness set to level 8 and keyboard backlighting turned off. Battery life varies by use and configuration. See apple.com/en/batteries for more information.

3 Display size is measured diagonally. The 13-inch MacBook Air display has rounded top corners. Measured as a standard rectangle, the display has a diagonal measurement of 13.6 inches (34.46 cm). The actual viewable area is less.

4 Wi-Fi 7 is available in countries and regions where it is supported.

5 FaceTime calls require both the caller and the recipient to have a FaceTime-enabled device and a Wi-Fi connection.
