Angelbird USB-C 3.2 Solid Flex Tether Cable, Right-Angle, Lime, 4.5 m / 14.8 ft

Product information

Designed for fast tethered shooting, this 4.5 m USB-C Solid Flex™ cable ensures low-latency, stable connections between your camera and computer. With data transfer rates of 20 Gbps, 240 W fast charging, and support for high-resolution video output, this ultra-flexible and reliable cable delivers the speed and performance needed for smooth operation, even during the most demanding studio shoots.

FEATURES

• Manage your cable with ease
This USB-C 3.2 Solid Flex™ cable features an ultra-flexible and durable design with a cotton jacket for reliable connections and enhanced usability.

• Accelerate your workflow
Thanks to the USB-C 3.2 Gen 2x2 connector, you get transfer speeds of up to 20 Gbps and broad device compatibility, allowing you to flexibly connect a variety of devices.

• Charge your devices at lightning speed
With a power output of up to 240 watts (48 V / 5 A), this cable charges your devices—laptops, tablets, and mobile phones—at top speed.

• Enjoy stunning visual results
Supports high-resolution 4K video at 60 Hz via DisplayPort Alt Mode—ideal for smooth playback, external monitor setups, and live previews on set.

• Maintain visual clarity in your setup
The highly visible lime green signal color helps you quickly identify and organize cables, improving safety and efficiency in busy production environments.

• Download your files safely and quickly

This cable features an integrated E-Marker, ensuring secure data and power transmission between source and sink.
