Reliability You Can Roll On
Glyph Capture+ CFexpress Type B 4.0 cards are engineered for creators who demand consistent performance in real-world conditions. Designed for sustained write speeds and thermal stability. Capture+ supports uninterrupted recording for professional photo and video workflows.

Product information

With SteadyIO™, transfer speeds stay stable across large, sustained workloads. No throttling, no thermal slowdowns.

Performance with purpose
Real world speeds up to 3,700/3,500 MB/s (R/W) with sustained write speeds of up to 3,000 MB/s help tackle 12K+ RAW video capture and fast burst RAW image sequences.

SteadyIO™ Technology
SteadyIO™ technology delivers consistent, uninterrupted read and write speeds across the full capacity, so you never miss a frame.

Intelligent power loss handling
Designed to protect in-flight writes in case of camera power loss. Built in safeguards save buffer files and safely shutdown the card.

Advanced Thermal & Power Management
Capture+ cards operate with minimal power draw to preserve camera battery and smartly manage thermals to prevent overheating.

Designed to endure
Glyph Capture+ cards are extreme temperature, moisture, dust, shock, x-ray, and magnetic proof.

Fully Compliant
Featuring the latest CFexpress Type B 4.0 specification. Backwards compatible with CFexpress 1.0 and 2.0 devices.

Production-grade storage
Glyph has been in the storage game for over 32 years and trusted by creative professionals around the globe. Whether you are a filmmaker, photographer, or aspiring music producer, you can trust Glyph when it matters most.

Built to record. Built to last.
Built on the latest generation of CFexpress Type B leveraging PCIe connectivity, the Capture+ card is optimized for modern cinema and hybrid cameras, while remaining backward compatible with CFexpress Type B 2.0 for seamless integration into existing setups.

5 Year Warranty
