3 to your specific workflow.

With a Creative Touch
Thanks to 10-point multi-touch functionality, you can interact with your on-screen content using your hands alongside the pen. With intuitive gestures for panning, zooming, and rotating, you can fully immerse yourself in your creative process. Switching between touch gestures and pen input happens seamlessly—in a single fluid motion.

Always at the Right Angle
The Wacom Cintiq Pro Stand was specifically designed to deliver maximum comfort, flexibility, and stability—whether at a desk or in a remote workspace. The Wacom Cintiq Pro 27 and 22 models require a stand* or a compatible VESA monitor arm (100 x 100 mm).**

As Fast as Your Ideas
ExpressKeys enable an intuitive workflow. Each button—positioned on the display's new rear grip—can be assigned to a shortcut of your choice. Thanks to this intuitive design, you can access your favorite shortcuts before you even realize you need them.

More Space for You
The Wacom Cintiq Pro Extension Table*** provides space to rest your keyboard, phone, or sketchbook, while integrated 1/4-inch UNC tripod threads allow you to attach cameras, microphones, and LED lights.

Effortless Creativity
Thanks to an improved sampling rate that harmonizes perfectly with the display, every pen stroke becomes fluid art—free from jitter, lag, or "ghosting." Whether laying down bold color strokes or sketching feather-light lines, the pen's high pressure and tilt sensitivity ensure a comfortable, natural drawing experience. Impressive Colors
Thanks to authentic and consistent color reproduction, you have full control over your color-critical workflow right from the start. High coverage of Adobe RGB and the film industry standard DCI-P3 offers artists a larger color space and a wider palette of colors to work with. Our displays—certified as Pantone™ Validated and Pantone SkinTone™ Validated—ensure that the colors you see on screen accurately reproduce realistic skin tones and print exactly as they appear.

More Screen, Less Space
A super-slim bezel and the innovative placement of ExpressKey™ buttons allow for a more compact pen display that fits on more desks.

Sustainable Design
Recycled materials were used wherever possible for the Wacom Cintiq Pro and its packaging, making it the most sustainable Cintiq Pro ever created.

*The Wacom Cintiq Pro Stand is available separately for the Cintiq Pro 27, 22, and 17. The Cintiq Pro 17 includes an "Easy Stand" that provides a fixed tilt angle.
**Sold separately. A monitor arm is required to rotate the display 180 degrees (from landscape to portrait mode): VESA 75 x 75 mm for the Cintiq Pro 17.
***Sold separately; the Extension Table is not available for the Cintiq Pro 17.
