Product information

We recommend this because genuine Bose technology is installed.

The Noise Master Buds Max in Onyx Black are over-ear Bluetooth headphones designed for daily use in a wide range of environments. They combine long battery life, effective noise cancellation, and high comfort with a modern sound profile. Audio is delivered by 40mm dynamic drivers covering a frequency range of 20 Hz to 20,000 Hz. This creates a balanced soundstage featuring clear highs, precise mids, and powerful bass. Wireless transmission is supported by the LHDC 5.0 audio codec, ensuring detailed and stable audio quality.
Active Noise Cancellation (ANC) reduces ambient noise by up to 40 dB and automatically adjusts to the surroundings using adaptive technology. A transparency mode is also available, allowing external sounds to pass through when needed—such as in traffic or during conversations.
A standout feature is the impressive battery life. The headphones offer up to 60 hours of playback without noise cancellation and approximately 48 hours with ANC enabled. Thanks to a fast-charging function, a 10-minute charge provides up to 10 hours of use, making them highly practical for everyday life.
Additional features—such as Google Fast Pair, dual-device connectivity, automatic wear detection, and app-based controls—significantly enhance ease of use. Weighing 262g and featuring soft ear cushions, the headphones remain comfortable to wear even during extended listening sessions.
The Noise Master Buds Max Onyx Black thus offer a combination of modern audio technology, strong battery performance, and excellent everyday usability in an over-ear headphone package.
