The **Leica APO-Macro-Elmarit-SL 1:2.8/100 ASPH.** is a high-quality **100-mm macro lens** for the **L-Mount system** that combines precise image reproduction, high light transmission, and smooth operation. The APO design ensures exceptionally clear detail reproduction with impressive sharpness all the way to the edges. With a **1:1 reproduction ratio** and a

minimum focusing distance of **30 cm**, the lens is suitable for detailed macro photography as well as expressive portraits with a natural perspective.

The fast and silent autofocus with a focus limiter facilitates efficient work in changing shooting situations. The **all-metal** construction ensures high stability, while the **Aqua Dura coating** protects the front element in everyday use. Nine aperture blades contribute to a harmonious bokeh and effectively set subject details apart from the background. The lens combines technical precision with a minimalist, professional design.

- **100 mm focal length** with an aperture of **f/2.8**
- **1:1 macro capability** and a minimum focusing distance of **30 cm**
- **APO lens design** for high sharpness and reduced chromatic aberrations
- **Fast, silent autofocus** with focus limiter
- **9 aperture blades** for a smooth, soft bokeh
- **All-metal** body with **L-mount**
- **Aqua Dura coating** and **E67 filter thread**
- Weight: **801 g**; Dimensions: **76.8 mm** diameter, **137.6 mm** length

The package includes the matching lens hood, front cap, rear cap, lens case, and instruction manual. The **Leica macro lens** is designed for demanding applications in macro photography and portrait work, where attention to detail, reliability, and a premium look are paramount.
